DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The present invention describes a device comprising of a ground pad Vss connected to a p+ region. There is no support for a device consisting of the limitations as recited in claims 1 and 8. That is, there is no support for a device which does not include a ground pad Vss connected to a p+ region.

Allowable Subject Matter

3. Claims 14-20 are allowed.

Art Unit: 2811

Reasons for allowance

4. The following is an examiner's statement of reasons for allowance:

Voogel (5,959,821), Yu (5,742,085) and Amerasekera appear to be the closest prior art reference. Voogel, Yu and Amerasekera teach substantially the entire claimed structure, as recited in claim 14, except a device consisting of the claimed limitations. Therefore, prior art do not teach or render obviousness the semiconductor structure, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

5. Applicant argues that the disclosure of the invention conveys to an artisan that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support in the disclosure for a device consisting of the limitations as recited in claims 1 and 8, and which can operate without a ground pad Vss connected to a p+ region.

Art Unit: 2811

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
